	Proportion of Significant Tests	Bias	Standard Deviation $\log(\lambda)$	Coverage
RR = 1	0.0463	0.0195	0.2036	0.9383
RR = 0.6	0.6348	0.0117	0.2092	0.9412
RR = 0.5	0.8629	0.0098	0.2134	0.9438
RR = 0.4	0.9755	0.0078	0.2196	0.9479
RR = 0.3	0.9992	0.0059	0.2285	0.9535

Table 1: The results from 10,000 permuted intervention allocations cross 9 time periods of historical data for 1,000 cases.
